

Healthy skin all year long

Need care for your skin? Virtual primary care providers at First Stop Health can help with sun safety, acne, aging and more all via phone or video! Here's how:

Evaluate and diagnose common skin issues such as acne, eczema, psoriasis, and dryness, and provide personalized treatment plans.

If necessary, **your provider can prescribe medications**, including topical creams, oral medications, or other treatments.

Provide guidance on how to support your skin health, recommend products for your skin type, and provide tips on how to protect against sun exposure.

If your skin condition requires specialized care, **your provider can provide referrals** to an in-network dermatologist or other skin health specialists.
